### 1.0 Revision History

| Version | Date <br> (YYYY-MM-DD) | Person | Description of Change |
| :--- | :--- | :--- | :--- |
| 0.1 | $2001-11-30$ | Jason Roberts | Draft |
| 0.2 | $2002-02-14$ | Jason Roberts | Initial Release |
| 1.0 | $2009-07-27$ | John Stukes | Initial Purchase Order Release |
| 1.1 | $2011-11-03$ | John Stukes | PIDX Derivative Works |
|  |  |  |  |
|  |  |  |  |

### 2.0 Executive Summary

### 2.1 Purpose

The purpose of the PIDX Purchase Order Implementation Guide document is to assist trading partners to implement and use the PIDX XML instance (data) documents. The PIDX Purchase Order Implementation Guide document is the property of the Petroleum Information Data Exchange, International (PIDX International).

### 2.1.1 Replicable

Each group of trading partners has unique implementation requirements. The PIDX Purchase Order Implementation Guide document describes a generalized process to identify those requirements and establish an agreement to meet each trading partner's business process and associated data requirements.

### 2.1.2 Extensibility/Modifiability

The PIDX Purchase Order Implementation Guide document was created with the realization that changes will occur to meet changing technology and business requirements.
The PIDX Purchase Order Implementation Guide document may be modified by approval of the PIDX Standards and Guidelines Committee. Submit requests for document changes to the PIDX Standards and Guidelines Committee for review, revision, and approval.

Note changes to this document in the Revision History (section 1) of this document.

### 2.2 Scope

### 2.2.1 Audience

The targeted audience of the PIDX Purchase Order Implementation Guide document is petroleum industry individuals who are responsible for implementing PIDX XML documents. This document assumes

- An understanding of XML documents, W3C XML Schemas including XML Datatypes, XML Namespaces, and a general knowledge of business data processing
- An understanding of the PIDX Transport, Routing, and Packaging (TRP) Standards
- An understanding of the RosettaNet Implementation Framework (RNIF) 2.0
- An understanding of the PIDX XML Schema Standards
- An understanding of the specific XML Schemas which will be used to define data which is exchanged between/among the trading partners

This document does not attempt to teach a person who is unfamiliar with XML documents, XML Schemas, RosettaNet Implementation Framework (RNIF) 2.0 how to use these technologies.

### 2.2.2 Transport, Routing, and Packaging and Data Payload

The PIDX Purchase Order Implementation Guide address issues relating to both the data-carrying XML documents (payload) and the PIDX Transport, Routing, and Packaging requirements which is based on RNIF 2.0.

The place to go for
oil and gas e-business standards

### 2.3 References

### 2.3.1 PIDX Documents

The following PIDX documents support the PIDX XML Schema Standards.

- PIDX XML Standards
- Petroleum Industry Data Dictionary
- PIDX Glossary

### 2.3.2 W3C Documents

The PIDX XML Schemas Standards conform to the May 2, 2001 XML Schema Recommendation published by the World Wide Web Consortium (W3C).

XML Schema Part 0: Primer :
XML Schema Part 1: Structures:
XML Schema Part 2: Datatypes:
http://www.w3.org/TR/2001/REC-xmlschema-0-20010502/
http://www.w3.org/TR/2001/REC-xmlschema-1-20010502/
http://www.w3.org/TR/2001/REC-xmlschema-2-20010502/

### 2.3.3 RosettaNet Documents

The PIDX Routing, Transmission, and Packaging Standards are built on RosettaNet Implementation Framework (RNIF) 2.0 standards. The RNIF 2.0 standards may be downloaded from the RosettaNet web site: http://www.RosettaNet.org

### 2.4 Approach

The general approach to implementing a PIDX process between/among trading partners includes the following steps:

1. Define the Business Processes and supporting interactions between/among the business partners.
2. Identify the PIDX XML transactions required to support the PO Business Process.
3. Identify detailed data requirements for each transaction.

### 2.5 Define the Business Processes

Use the PIDX Business Process diagrams to define the business process that the trading partners will use to perform the business function. Redraw the Business Process diagrams to define the specific business process that the trading partners will use.

### 2.6 Identify XML Transactions

Use the Business Process diagrams to define which PIDX XML transactions will be exchanged by the trading partners. The currently defined PIDX transactions are:

- OrderCreate
- OrderChange
- OrderResponse

### 2.7 Define XML Transactions Elements

Trading partners need to identify each data element within each XML transaction that will be transferred. For each data element the trading partners need to identify:

- If the data element is mandatory, optional, or forbidden
- The data format of the data element
- Possible default values for the data element if absent
- Relationships between/among multiple data elements

The trading partners must evaluate all repeating groups of elements. The must define constraints on element groups and the number and meaning of repeating groups.

### 3.0 Implementation Checklist

Please refer to the following implementation checklist when planning and implementing the use of PIDX XML Schemas.

### 3.1 Administrative

- Create required legal agreement between or among trading partners
- Define operating procedures in accord with anti-trust guidelines
- Establish project objectives, scope
- Establish project contacts: business, technical, operational
- Develop an implementation project plan

### 3.2 Define Project Requirements

- Define business process and transaction requirements
- Define error-processing requirements
- Define problem resolution requirements
- Define security requirements
- Confidentiality
- Integrity
- Availability
- Non-repudiation
- Define application interface requirements (proprietary to each trading partner)
- Define transaction storage and audit requirements

### 3.3 Define Technical Requirements

- Define each Action and Signal message that will be exchanged
- Define field by field requirements for each Action (business) message
- Define field by field requirements for each Signal message
- Define data communication and network (firewall, router) access requirements
- Define transmission protocol (HTTP(S), SMTP, other) requirements
- Define each field in TRP Preamble header
- Define each field in TRP Delivery header
- Define each field in TRP Service header
- Define each TRP attachment
- Define what will be encrypted
- Define use of digital signatures
- Define use of the message "digest" for non-repudiation
- Define business recovery requirements
- Define hardware requirements
- Define software requirements

### 3.4 Define Business Process Requirements

- Define internal business process requirements (proprietary to each trading partner)
- Train internal staff (proprietary to each trading partner)

### 3.5 XML Transaction Checklist

- Develop, test, and implement the creation of each Action TRP transaction
- Develop, test, and implement the acceptance and processing of each Action TRP transaction
- Develop, test, and implement the creation of each Signal TRP transaction
- Develop, test, and implement the acceptance and processing of each Signal TRP transaction

### 3.6 Data Communication checklist

- Install, configure, test, and implement each network component
- Exchange IP addresses/names
- Configure firewalls, routers, other communications equipment

### 3.7 Application Checklist

- Define, build/install, test, and implement application interfaces (proprietary to each trading partner)
- Define, build/install packaging, unpackaging processes
- Define, build/install, test, and implement error processes
- Implement application support processes

### 3.8 Operations Checklist

- Install, configure, implement hardware
- Install, configure, implement software
- Install, configure, implement network components
- Install, configure, implement data storage and backup
- Define, test, and implement business recovery processes
- Train operation and network support personnel

### 4.0 Order Create

### 4.1 Business Process Diagram

Below is the Business Process Diagram for the Order Create transaction, using either a B2B or Marketplace model. Solid lines indicate transactions between a Buyer and Seller directly. Dashed lines illustrate the transactions between the Buyer and Seller via a Marketplace. These are not the only two methods in which the process can take place, however, they represent the two primary processes. Third parties other than a Marketplace may be involved if necessary.

B2B Model - A Buyer or buying organization makes a commitment to purchase a service or complex product. A purchase order is created and sent to the Seller. The Seller processes the order and sends a response to the Buyer either accepting or denying the terms of the order.

Marketplace Model - A Buyer or buying organization makes a commitment to purchase a service or complex product. A purchase order is created on a Marketplace and sent to the Seller. The Seller processes the order and sends a response to the Buyer through the Marketplace either accepting or denying the terms of the order.

The Order Create document is used when a Buyer has made a commitment to purchase a service or complex product. The order may be the result of the acceptance of a Request Requisition Return, the acceptance of a quote, or as a completely new request.

### 4.2 Legend to Tables

The following tables detail the elements and attributes that make up the Order Create. The legend below provides guidance to understanding the element tables. The legend is an example only and is not part of the document standard data.

## Telephone

A collection of elements detailing information about a telephone number.

\begin{tabular}{|c|c|c|c|c|}
\hline \multicolumn{5}{|l|}{(3) note} \\
\hline level \& \multicolumn{4}{|l|}{} \\
\hline children \& \begin{tabular}{l}
5 \\
A numerical sequence to reach a telephone attached to a communication network. PhoneNumberExtension \\
An extension number that is needed to further identify the phone number. TelecomCountryCode \\
The dialing code from another country to access the telephone network in another country. \\
TelecomAreaCode \\
The area code within a country or jurisdiction, if needed, to access local telephones within the country.
\end{tabular} \& Type \(s .89\) string string string \& Use
M
O

0

0 \& | Max |
| :--- |
| 1 |
| 1 |
| 1 |
| 1 | <br>

\hline parent(s) \& Contact 9 rmation \& \& \& <br>

\hline attributes \& | A code to indicate the type of phone number being given. |

0 \& Fixed <br>
\hline
\end{tabular}

| Legend |  |
| :--- | :--- |
| 1 | The name of the element. |
| 2 | The definition of the element. |
| 3 | Contains any business rules or comments about the element |
| 4 | Identifies whether or not the element is under the Property, Detail, or Summary level of the document |
| 5 | Contains the name of the child elements and their definitions. Those elements in blue are links to the element specification. Only those elements that contain children or attributes are hyperlinked. |
| 6 | Indicates the data type of the element. |
| 7 | Indicates whether the element is mandatory (M) or optional (O). |
| 8 | Indicates whether the element can have a maximum of one occurrence (1) or unbounded multiple occurrences (U) |
| 9 | Indicates the parent element of the element. |
| 10 | Contains the name of any attributes and their definitions. |
| 11 | Indicates the data type of the attribute. If the type is blank, then the element contains children rather than data. |
| 12 | Indicates whether the attribute is mandatory (M) or optional (O). |
| 13 | Provides a fixed value for the attribute. |
| 14 | The shaded areas provide either code list values, rules, or notes about the child element or attribute. |

The document, its properties, details, line item, sub-line item, and summary elements are presented first. They are followed by an alphabetical listing of those elements used in the document and have children or attributes.

### 4.3 Document Detail

## OrderCreate

The root element of the Order Create message. It is used to place an order for products and/or services.

\begin{tabular}{|c|c|c|c|c|}

## OrderCreateProperties

A collection of elements defining the order "meta-data" or "common data".

| note |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| children | Name | Type | Use | Max |
|  | PurchaseOrderNumber | string | M | 1 |
|  | A unique identifier for an Order Create message. |  |  |  |
|  | PurchaseOrderlssuedDate | date | M | 1 |
|  | The date upon which an order was created or deemed to have been issued. |  |  |  |
|  | Format is CCYY-MM-DD where "CC" represents the century, "YY" the year, "MM" the month and "DD" the day. |  |  |  |
|  | Partnerinformation |  | M | 1 |
|  | A collection of elements detailing partner information. |  |  |  |
|  | At a minimum, a BillTo and ShipTo, or a BillAndShipTo is required. |  |  |  |
|  | PurchaseOrderTypeCode | string | M | 1 |
|  | A code indicating the kind of purchase order. |  |  |  |
|  | Confirmation |  |  |  |
|  | EmergencyOrder |  |  |  |
|  | ReleaseOrDeliveryOrder |  |  |  |
|  | RushOrder |  |  |  |
|  | StandAloneOrder |  |  |  |
|  | SupplyOrServiceOrder |  |  |  |
|  | Other |  |  |  |
|  | RevisionNumber | string | 0 | 1 |
|  | A number indicating the version of the document. It is used if a message is resent in its entirety to replace an earlier version. |  |  |  |
|  | ReleaseNumber | string | 0 | 1 |
|  | A number identifying a release against a purchase order previously placed by the parties involved in the transaction. It is the equivalent to a work order number. |  |  |  |
|  | SpeciallnvoicePreference | string | 0 | 1 |
|  | A code indicating any special invoice requirements. |  |  |  |
|  | InvoiceNotRequired |  |  |  |
|  | Other |  |  |  |
|  | PrimaryCurrency |  | 0 | 1 |
|  | The currency code indicating the currency to be used for the transaction. |  |  |  |
|  | SecondCurrency |  | 0 | 1 |
|  | The currency code indicating a second currency, such as for European countries using the Euro and a local currency. |  |  |  |
|  | LanguageCode | string | 0 | 1 |
|  | A code indicating the language used for the transaction. |  |  |  |
|  | Use the codelist from ISO 639-2:1998 Codes for the representation of names of languages - Part 2: Alpha-3 Code. |  |  |  |
|  | JobLocationInformation |  | 0 | 1 |
|  | A collection of elements giving details of a job location. |  |  |  |
|  | ServiceDateTime | datetime | 0 | U |
|  | The actual and/or schedule dates for a service. |  |  |  |
|  | CountryOfOrigin |  | 0 | 1 |
|  | The country where product originates or is deemed to have originated. |  |  |  |

|  | CountryOfFinalDestination |  | 0 | 1 |
| :---: | :---: | :---: | :---: | :---: |
|  | The country where product is ultimately delivered or is deemed to have been delivered. |  |  |  |
|  | TransportInformation |  | 0 | 1 |
|  | A code indicating the mode of transportation used to move product. PaymentTerms |  | 0 | 1 |
|  | A collection of elements detailing payment terms information. CreditCardInformation |  | 0 | 1 |
|  | A collection of elements defining the details of a credit card. |  |  |  |
|  | Speciallnstructions | string | 0 | U |
|  | A free-form textual description of special requirements. |  |  |  |
|  | Referencelnformation |  | 0 | U |
|  | A collection of elements detailing references to information that reside outside of the current transaction message. |  |  |  |
|  | Attachment |  | 0 | U |
|  | A collection of elements defining the details of an attachment to the document. |  |  |  |
|  | Comment | string | 0 | 1 |
|  | A free-form textual structure for general information or comments. |  |  |  |
| parent(s) | OrderCreate |  |  |  |

## OrderCreateDetails

A collection of elements defining the details of the Order Create message.

| note |  |  |  |
| ---: | :--- | :---: | :---: |
| children | Name | Type | Use |
|  | OrderCreateLineltem | Max |  |
|  | A collection of elements defining the details of the line items making up the order. |  | $\mathbf{M}$ |

## OrderCreateLineltem

A collection of elements defining the details of the line items making up the order.

| note |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| children | Name | Type | Use | Max |
|  | LineltemNumber | string | M | 1 |
|  | A sequential individual line identifier within a document containing service or item information. |  |  |  |
|  | LineltemInformation |  | M | 1 |
|  | A collection of elements detailing identifying information about a line item. OrderQuantity |  | M | 1 |
|  | The number of units of an item or service ordered. |  |  |  |
|  | CommodityCode | string | 0 | U |
|  | A code indicating the categorization of a product or service in accordance with a particular standard. |  |  |  |
|  | Partnerinformation |  | 0 | U |
|  | A collection of elements detailing partner information. |  |  |  |
|  | JobLocationInformation |  | 0 | 1 |
|  | A collection of elements giving details of a job location. |  |  |  |
|  | Pricing |  | 0 | 1 |
|  | A collection of elements detailing price information. |  |  |  |
|  | AllowanceOrCharge |  | 0 | U |
|  | A collection of elements defining the details of an allowance or charge to the custom | er. |  |  |
|  | Tax |  | 0 | U |
|  | A collection of elements detailing information about tax applied to a transaction. LineltemTotal |  | 0 | 1 |
|  | The net total monetary amount for the line item. |  |  |  |
|  | ServiceDateTime | datetime | 0 | U |
|  | The actual and/or schedule dates for a service. |  |  |  |
|  | CountryOfOrigin |  | 0 | 1 |
|  | The country where product originates or is deemed to have originated. |  |  |  |
|  | CountryOfFinalDestination |  | 0 | 1 |
|  | The country where product is ultimately delivered or is deemed to have been delive |  |  |  |
|  | TransportInformation |  | 0 | 1 |
|  | A code indicating the mode of transportation used to move product. |  |  |  |
|  | PaymentTerms |  | 0 | 1 |
|  | A collection of elements detailing payment terms information. |  |  |  |
|  | CreditCardInformation |  | 0 | 1 |
|  | A collection of elements defining the details of a credit card. |  |  |  |
|  | Speciallnstructions | string | 0 | U |
|  | A free-form textual description of special requirements. |  |  |  |
|  | PackagingCharacteristicCode | string | 0 | U |
|  | A code indicating the marking, packaging, loading and related characteristics being described. |  |  |  |
|  | PackageSpecifications |  |  |  |
|  | ProductMarking |  |  |  |
|  | SkidPalletType |  |  |  |

## OrderCreateSubLineltem

A collection of elements defining the details of the sub line items of an order. It is used if a line item needs to be broken down into further detail.

| note |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| children | Name | Type | Use | Max |
|  | SubLineltemNumber | string | M | 1 |
|  | The sub-line item number relating to the primary line item referenced in the message. |  |  |  |
|  | LineltemInformation |  | M | 1 |
|  | A collection of elements detailing identifying information about a line item. OrderQuantity |  | M | 1 |
|  | The number of units of an item or service ordered. |  |  |  |
|  | CommodityCode | string | 0 | $\mathbf{U}$ |
|  | A code indicating the categorization of a product or service in accordance with a particular standard. |  |  |  |
|  | PartnerInformation |  | 0 | $\mathbf{U}$ |
|  | A collection of elements detailing partner information. JobLocationInformation |  | 0 | 1 |
|  | A collection of elements giving details of a job location. |  |  |  |
|  | Pricing |  | 0 | 1 |
|  | A collection of elements detailing price information. |  |  |  |
|  | AllowanceOrCharge |  | 0 | $\mathbf{U}$ |
|  | A collection of elements defining the details of an allowance or charge to the custom Tax | er. | 0 | U |
|  | A collection of elements detailing information about tax applied to a transaction. LineltemTotal |  | 0 | 1 |
|  | The net total monetary amount for the line item. |  |  |  |
|  | ServiceDateTime | datetime | 0 | $\mathbf{U}$ |
|  | The actual and/or schedule dates for a service. |  |  |  |
|  | CountryOfOrigin |  | 0 | 1 |
|  | The country where product originates or is deemed to have originated. |  |  |  |
|  | CountryOfFinalDestination |  | 0 | 1 |
|  | The country where product is ultimately delivered or is deemed to have been deliver TransportInformation | ed. | 0 | 1 |
|  | A code indicating the mode of transportation used to move product. |  |  |  |
|  | PaymentTerms |  | 0 | 1 |
|  | A collection of elements detailing payment terms information. CreditCardInformation |  | 0 | 1 |
|  | A collection of elements defining the details of a credit card. <br> Speciallnstructions | string | 0 | $\mathbf{U}$ |
|  | A free-form textual description of special requirements. |  |  |  |
|  | PackagingCharacteristicCode | string | 0 | $\mathbf{U}$ |
|  | A code indicating the marking, packaging, loading and related characteristics being described. |  |  |  |
|  | PackageSpecifications |  |  |  |
|  | ProductMarking |  |  |  |
|  | SkidPalletType |  |  |  |

|  | TypeOfPackage | string | 0 | U |
| :---: | :---: | :---: | :---: | :---: |
|  | Other |  |  |  |
|  | PackagingCharacteristicDescription |  |  |  |
|  | Free-form text providing any additional information associated with the Packaging Characteristic Code. |  |  |  |
|  | Referencelnformation |  | 0 | U |
|  | A collection of elements detailing references to information that reside outside of the current transaction message. |  |  |  |
|  | Attachment |  | 0 | U |
|  | A collection of elements defining the details of an attachment to the document. |  |  |  |
|  | Comment | string | 0 | 1 |
|  | A free-form textual structure for general information or comments. |  |  |  |
| parent(s) | OrderCreateLineltem |  |  |  |

## OrderCreateSummary

A collection of elements detailing the totals of the order.

| note |  |  |  |  |
| ---: | :--- | :--- | :---: | :---: |
| children | Name | Type | Use | Max |
|  | TotalLineltems | integer | $\mathbf{M}$ | $\mathbf{1}$ |
|  | The total number of line items contained in a message. |  |  |  |
|  | TotalAmount | $\mathbf{0}$ | $\mathbf{1}$ |  |
|  | The total monetary amount of an order. |  |  |  |
| parent(s) | OrderCreate |  |  |  |

## Addressinformation

A collection of elements defining the details of an address.

## AllowanceOrCharge

A collection of elements defining the details of an allowance or charge to the customer.

| note | - If AllowanceOrCharge is used, then at least one of AllowanceOrChargeRate, AllowanceOrChargeTotalAmount, or AllowanceOrChargePercent is required. |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| level | OrderCreateDetails |  |  |  |
| children | Name | Type | Use | Max |
|  | AllowanceOrChargeTotalAmount |  | 0 | 1 |
|  | The total monetary amount for the allowance or charge. |  |  |  |
|  | AllowanceOrChargeRate |  | 0 | 1 |
|  | The rate per unit of the allowance or charge. |  |  |  |
|  | AllowanceOrChargePercent | decimal | 0 | 1 |
|  | The allowance or charge expressed as a percentage. |  |  |  |
|  | AllowanceOrChargeNumber | string | 0 | 1 |
|  | The identifier assigned by a vendor referencing an allowance, promotion, deal or charge. |  |  |  |
|  | AllowanceOrChargeTypeCode | string | 0 | 1 |
|  | A code identifying the kind of allowance or charge being described. |  |  |  |
|  | Freight |  |  |  |
|  | FuelSurcharge |  |  |  |
|  | SpecialHandlingService |  |  |  |
|  | Discount |  |  |  |

## SecondCurrency

The currency code indicating a second currency, such as for European countries using the Euro and a local currency.

| note |  |  |  |  |
| ---: | :--- | :--- | :--- | :---: |
| level | OrderCreateProperties | Type | Use | Max |
| children | Name | string | M | $\mathbf{1}$ |
|  | CurrencyCode |  |  |  |
|  | A code indicating the currency in which the monetary amount is specified. <br> Use the codelist from ISO 4217:2001 Codes for the representation of currencies <br> and funds. |  |  |  |
| parent(s) | $\underline{\text { OrderCreateProperties }}$ |  |  |  |

## ServiceDateTime

The actual and/or schedule dates for a service.

| note | Format is CCYY-MM-DDThh:mm:ss where "CC" represents the century, "YY" the year, "MM" the month and "DD" the day. The letter "T" is the date/time separator and "hh", "mm", "ss" represent hour, minute and second respectively. <br> The CCYY field must have at least four digits, the MM, DD, SS, hh, mm and ss fields exactly two digits each. Leading zeroes must be used if the field would otherwise have too few digits. <br> If no time is to be given then use zeroes in the hh, mm and ss fields. <br> This representation may be immediately followed by a "Z" to indicate Coordinated Universal Time (UTC) or, to indicate the time zone, i.e. the difference between the local time and Coordinated Universal Time, immediately followed by a sign, + or - , followed by the difference from UTC represented as hh:mm (note: the minutes part is required). For example, to indicate $1: 20$ pm on May the 31st, 1999 for Eastern Standard Time which is 5 hours behind Coordinated Universal Time (UTC), one would write: 1999-05-31T13:20:00-05:00. |

### 5.0 Order Response

### 5.1 Business Process Diagram

Below is the Business Process Diagram for the Order Response transaction, using either a B2B or Marketplace model. Solid lines indicate transactions between a Buyer and Seller directly. Dashed lines illustrate the transactions between the Buyer and Seller via a Marketplace. These are not the only two methods in which the process can take place, however, they represent the two primary processes. Third parties other than a Marketplace may be involved if necessary.

B2B Model - A Buyer or buying organization makes a commitment to purchase a service or complex product. A purchase order is created and sent to the Seller. The Seller processes the order and sends a response to the Buyer either accepting or denying the terms of the order.

Marketplace Model - A Buyer or buying organization makes a commitment to purchase a service or complex product. A purchase order is created on a Marketplace and sent to the Seller. The Seller processes the order and sends a response to the Buyer through the Marketplace either accepting or denying the terms of the order.

The Order Response document is used as a response from a Buyer's request for an order. The response allows the Seller to accept, change, or deny parts or all of the order.

### 5.2 Legend to Tables

The following tables detail the elements and attributes that make up the Order Response. The legend below provides guidance to understanding the element tables. The legend is an example only and is not part of the document standard data.

A collection of elements detailing information about a telephone number.

| Legend |  |
| :--- | :--- |
| 1 | The name of the element. |
| 2 | The definition of the element. |
| 3 | Contains any business rules or comments about the element |
| 4 | Identifies whether or not the element is under the Property, Detail, or Summary level of the document |
| 5 | Contains the name of the child elements and their definitions. Those elements in blue are links to the element <br> specification. Only those elements that contain children or attributes are hyperlinked. |
| 6 | Indicates the data type of the element. |
| 7 | Indicates whether the element is mandatory (M) or optional (O). |
| 8 | Indicates whether the element can have a maximum of one occurrence (1) or unbounded multiple occurrences (U) |
| 9 | Indicates the parent element of the element. |
| 10 | Contains the name of any attributes and their definitions. |
| 11 | Indicates the data type of the attribute. If the type is blank, then the element contains children rather than data. |
| 12 | Indicates whether the attribute is mandatory (M) or optional (O). |

The place to go for

| 13 | Provides a fixed value for the attribute. |
| :--- | :--- |
| 14 | The shaded areas provide either code list values, rules, or notes about the child element or attribute. |

The document, its properties, details, line item, sub-line item, and summary elements are presented first. They are followed by an alphabetical listing of those elements used in the document and have children or attributes.

### 5.3 Document Detail

## OrderResponse

The root element of the Order Response message. It is used to acknowledge a previously placed order or change order.

## OrderResponseProperties

A collection of elements defining the response "meta-data" or "common data".

| note |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| children | Name | Type | Use | Max |
|  | OrderResponseNumber | string | M | 1 |
|  | A unique identifier for an Order Response message. |  |  |  |
|  | OrderResponseDate | date | M | 1 |
|  | The date upon which an acknowledgement was created or deemed to have been issued. |  |  |  |
|  | Format is CCYY-MM-DD where "CC" represents the century, "YY" the year, "MM" the month and "DD" the day. |  |  |  |
|  | Partnerinformation |  | 0 | U |
|  | A collection of elements detailing partner information. |  |  |  |
|  | PurchaseOrderInformation |  | M | 1 |
|  | A collection of elements containing relevant purchase order information which needs to be referenced within other documentation and/or messages. |  |  |  |
|  | ChangeOrderInformation |  | 0 | 1 |
|  | A collection of elements which identifies a particular Change Order. |  |  |  |
|  | AcknowledgementType | string | 0 | 1 |
|  | A code identifying the kind of acknowledgement being sent. |  |  |  |
|  | SpeciallnvoicePreference | string | 0 | 1 |
|  | A code indicating any special invoice requirements. |  |  |  |
|  | InvoiceNotRequired |  |  |  |
|  | Other |  |  |  |
|  | PrimaryCurrency |  | 0 | 1 |
|  | The currency code indicating the currency to be used for the transaction. |  |  |  |
|  | SecondCurrency |  | 0 | 1 |
|  | The currency code indicating a second currency, such as for European countries using the Euro and a local currency. |  |  |  |
|  | LanguageCode | string | 0 | 1 |
|  | A code indicating the language used for the transaction. |  |  |  |
|  | Use the codelist from ISO 639-2:1998 Codes for the representation of names of languages - Part 2: Alpha-3 Code. |  |  |  |
|  | JobLocationInformation |  | 0 | 1 |
|  | A collection of elements giving details of a job location. |  |  |  |
|  | ServiceDateTime | datetime | 0 | U |
|  | The actual and/or schedule dates for a service. |  |  |  |
|  | CountryOfOrigin |  | 0 | 1 |
|  | The country where product originates or is deemed to have originated. CountryOfFinalDestination |  | 0 | 1 |

## OrderResponseLineltem

A collection of elements defining the details of the line items making up the response.

| note |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| children | Name | Type | Use | Max |
|  | PurchaseOrderLineltemNumber | string | M | 1 |
|  | A sequential individual line identifier within a purchase order document containing product or item information. |  |  |  |
|  | LineStatusCode | string | M | 1 |
|  | A code which indicates the whether a line item has been approved, rejected, or is pending. |  |  |  |
|  | Accept |  |  |  |
|  | Pending |  |  |  |
|  | Reject |  |  |  |
|  | Other |  |  |  |
|  | LineResponseReasonCode | string | M | 1 |
|  | A code indicating the response to the line item, such as accepted, rejected, etc. |  |  |  |
|  | LineltemInformation |  | M | 1 |
|  | A collection of elements detailing identifying information about a line item. |  |  |  |
|  |  |  | M | 1 |
|  | The number of units of an item or service ordered. |  |  |  |
|  | ChangeDescription | string | 0 | 1 |
|  | A free-form textual description of changes made. |  |  |  |
|  | CommodityCode | string | 0 | U |
|  | A code indicating the categorization of a product or service in accordance with a particular standard. |  |  |  |
|  | PartnerInformation |  | 0 | U |
|  | A collection of elements detailing partner information. |  |  |  |
|  | JobLocationInformation |  | 0 | 1 |
|  | A collection of elements giving details of a job location. |  |  |  |
|  | Pricing |  | 0 | 1 |
|  | A collection of elements detailing price information. |  |  |  |
|  | AllowanceOrCharge |  | 0 | U |
|  | A collection of elements defining the details of an allowance or charge to the custo |  |  |  |
|  | Tax |  | 0 | U |
|  | A collection of elements detailing information about tax applied to a transaction. |  |  |  |
|  | LineltemTotal |  | 0 | 1 |
|  | The net total monetary amount for the line item. |  |  |  |
|  | ServiceDateTime | datetime | 0 | U |
|  | The actual and/or schedule dates for a service. |  |  |  |
|  | CountryOfOrigin |  | 0 | 1 |
|  | The country where product originates or is deemed to have originated. |  |  |  |
|  | CountryOfFinalDestination |  | 0 | 1 |
|  | The country where product is ultimately delivered or is deemed to have been delive TransportInformation |  | 0 | 1 |
|  | A code indicating the mode of transportation used to move product. |  |  |  |
|  | PaymentTerms |  | 0 | 1 |
|  | A collection of elements detailing payment terms information. |  |  |  |

|  | CreditCardlnformation |  | 0 | 1 |
| :---: | :---: | :---: | :---: | :---: |

## OrderResponseSubLineltem

A collection of elements defining the details of the sub line items of a response. It is used if a line item needs to be broken down into further detail.

## OrderResponseSummary

A collection of elements detailing the totals of the response.

| note |  |  |  |  |
| ---: | :--- | :--- | :---: | :---: |
| children | Name | Type | Use | Max |
|  | TotalLineltems | integer | $\mathbf{M}$ | $\mathbf{1}$ |
|  | The total number of line items contained in a message. |  | $\mathbf{0}$ | $\mathbf{1}$ |
|  | $\underline{\text { TotalAmount }}$ |  |  |  |
| The total monetary amount of an order. |  |  |  |  |
| parent(s) | OrderResponse |  |  |  |

## Addressinformation

A collection of elements defining the details of an address.

| note |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| level | OrderResponseProperties |  |  |  |
| children | Name | Type | Use | Max |
|  | POBoxNumber | string | 0 | 1 |
|  | The identity of a physical box within a postal facility to accept and receive mail. |  |  |  |
|  | BuildingHouseNumber | string | 0 | 1 |
|  | The alphanumeric identifier of a building as a part of an address. |  |  |  |
|  | StreetName | string | 0 | 1 |
|  | The name of a street as part of an address. |  |  |  |
|  | AddressLine | string | 0 | U |
|  | An occurrence of a generally accepted formatted line of data such that when combined with the entire address structure there is sufficient information for delivery or location purposes. |  |  |  |
|  | CityName | string | 0 | 1 |
|  | The name of the city or municipality. |  |  |  |
|  | StateProvince | string | 0 | 1 |
|  | The name of the municipality or town as a location for mailing, siting and other geographic functions. |  |  |  |
|  | PostalCode | string | 0 | 1 |
|  | The code assigned by local postal authorities to delivery addresses. |  |  |  |
|  | PostalCountry |  | 0 | 1 |
|  | The country code indicating the country to which mail should be delivered. |  |  |  |
|  | County Name | string | 0 | 1 |
|  | The name of the county. |  |  |  |
|  | Locationldentifier |  |  |  |
|  | A unique identifier for a physical location. |  |  |  |
| parent(s) | JobLocationInformation |  |  |  |
|  | Location |  |  |  |
|  | PartnerInformation |  |  |  |
|  | TaxLocation |  |  |  |

## AllowanceOrCharge

A collection of elements defining the details of an allowance or charge to the customer.

| note | - If AllowanceOrCharge is used, then at least one of AllowanceOrChargeRate, AllowanceOrChargeTotalAmount, or AllowanceOrChargePercent is required. |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| level | OrderResponseDetails |  |  |  |
| children | Name | Type | Use | Max |
|  | AllowanceOrChargeTotalAmount |  | 0 | 1 |
|  | The total monetary amount for the allowance or charge. |  |  |  |
|  | AllowanceOrChargeRate |  | 0 | 1 |
|  | The rate per unit of the allowance or charge. |  |  |  |
|  | AllowanceOrChargePercent | decimal | 0 | 1 |
|  | The allowance or charge expressed as a percentage. |  |  |  |
|  | AllowanceOrChargeNumber | string | 0 | 1 |
|  | The identifier assigned by a vendor referencing an allowance, promotion, deal or charge. |  |  |  |
|  | AllowanceOrChargeTypeCode | string | 0 | 1 |
|  | A code identifying the kind of allowance or charge being described. |  |  |  |
|  | Freight |  |  |  |
|  | FuelSurcharge |  |  |  |
|  | SpecialHandlingService |  |  |  |

## SecondCurrency

The currency code indicating a second currency, such as for European countries using the Euro and a local currency.

| note |  |  |  |  |
| ---: | :--- | :--- | :--- | :---: |
| level | OrderResponseProperties |  |  |  |
| children | Name | Type | Use | Max |
|  | CurrencyCode | string | $\mathbf{M}$ | $\mathbf{1}$ |
|  | A code indicating the currency in which the monetary amount is specified. <br> Use the codelist from ISO 4217:2001 Codes for the representation of currencies <br> and funds. |  |  |  |
| parent(s) | OrderResponseProperties |  |  |  |

## ServiceDateTime

The actual and/or schedule dates for a service.

| note | Format is CCYY-MM-DDThh:mm:ss where "CC" represents the century, "YY" the year, "MM" the month and "DD" the day. The letter "T" is the date/time separator and "hh", "mm", "ss" represent hour, minute and second respectively. <br> The CCYY field must have at least four digits, the MM, DD, SS, hh, mm and ss fields exactly two digits each. Leading zeroes must be used if the field would otherwise have too few digits. <br> If no time is to be given then use zeroes in the hh, mm and ss fields. <br> This representation may be immediately followed by a "Z" to indicate Coordinated Universal Time (UTC) or, to indicate the time zone, i.e. the difference between the local time and Coordinated Universal Time, immediately followed by a sign, + or - , followed by the difference from UTC represented as hh:mm (note: the minutes part is required). For example, to indicate $1: 20$ pm on May the 31st, 1999 for Eastern Standard Time which is 5 hours behind Coordinated Universal Time (UTC), one would write: 1999-05-31T13:20:00-05:00. |

## parent(s) JobLocationInformation

### 6.0 Order Change

### 6.1 Business Process Diagram

Below is the Business Process Diagram for the Order Change transaction, using either a B2B or Marketplace model. Solid lines indicate transactions between a Buyer and Seller directly. Dashed lines illustrate the transactions between the Buyer and Seller via a Marketplace. These are not the only two methods in which the process can take place, however, they represent the two primary processes. Third parties other than a Marketplace may be involved if necessary.

B2B Model - A Buyer or buying organization makes a decision to change parts of a previously placed order. A change order is created and sent to the Seller. The Seller processes the change order and sends a response to the Buyer either accepting or denying the changes.

Marketplace Model - A Buyer or buying organization makes a decision to change parts of a previously placed order. A change order is created on a Marketplace and sent to the Seller. The Seller processes the order and sends a response to the Buyer through the Marketplace either accepting or denying the terms of the order.

The Order Change document is used when a Buyer wishes to alter a previously placed purchase order. The Buyer should send only the changes on the Order Change. If the order is to be cancelled, the Order Change can be used by canceling every line item on the order.

### 6.2 Legend to Tables

The following tables detail the elements and attributes that make up the Order Change. The legend below provides guidance to understanding the element tables. The legend is an example only and is not part of the document standard data.

A collection of elements detailing information about a telephone number.

| Legend |  |
| :--- | :--- |
| 1 | The name of the element. |
| 2 | The definition of the element. |
| 3 | Contains any business rules or comments about the element |
| 4 | Identifies whether or not the element is under the Property, Detail, or Summary level of the document |
| 5 | Contains the name of the child elements and their definitions. Those elements in blue are links to the element <br> specification. Only those elements that contain children or attributes are hyperlinked. |
| 6 | Indicates the data type of the element. |
| 7 | Indicates whether the element is mandatory (M) or optional (O). |
| 8 | Indicates whether the element can have a maximum of one occurrence (1) or unbounded multiple occurrences (U) |
| 9 | Indicates the parent element of the element. |
| 10 | Contains the name of any attributes and their definitions. |
| 11 | Indicates the data type of the attribute. If the type is blank, then the element contains children rather than data. |
| 12 | Indicates whether the attribute is mandatory (M) or optional (O). |

| 13 | Provides a fixed value for the attribute. |
| :--- | :--- |
| 14 | The shaded areas provide either code list values, rules, or notes about the child element or attribute. |

The document, its properties, details, line item, sub-line item, and summary elements are presented first. They are followed by an alphabetical listing of those elements used in the document and have children or attributes.

### 6.3 Document Detail

## OrderChange

The root element of the Order Change message. It is used to make changes to a previously placed order.

## OrderChangeProperties

A collection of elements defining the change order "meta-data" or "common data".

| note |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| children | Name | Type | Use | Max |
|  | OrderChangeNumber | string | M | 1 |
|  | A unique identifier for an Order Change message. |  |  |  |
|  | OrderChangeDate | date | M | 1 |
|  | The date upon which a change order was created or deemed to have been issued |  |  |  |
|  | Format is CCYY-MM-DD where "CC" represents the century, "YY" the year, "MM" the month and "DD" the day. |  |  |  |
|  | PurchaseOrderinformation |  | M | 1 |
|  | A collection of elements containing relevant purchase order information which needs to be referenced within other documentation and/or messages. |  |  |  |
|  | PartnerInformation |  | M | 1 |
|  | A collection of elements detailing partner information. |  |  |  |
|  | SequenceNumber | string | 0 | 1 |
|  | A number to identify the change or revision against an order. The first change submitted for an order would have a value of 1 , the second 2 , and so on. |  |  |  |
|  | SpeciallnvoicePreference | string | 0 | 1 |
|  | A code indicating any special invoice requirements. |  |  |  |
|  | InvoiceNotRequired |  |  |  |
|  | Other |  |  |  |
|  | PrimaryCurrency |  | 0 | 1 |
|  | The currency code indicating the currency to be used for the transaction. |  |  |  |
|  | SecondCurrency |  | 0 | 1 |
|  | The currency code indicating a second currency, such as for European countries using the Euro and a local currency. |  |  |  |
|  | LanguageCode | string | 0 | 1 |
|  | A code indicating the language used for the transaction. |  |  |  |
|  | Use the codelist from ISO 639-2:1998 Codes for the representation of names of languages - Part 2: Alpha-3 Code. |  |  |  |
|  | JobLocationInformation |  | 0 | 1 |
|  | A collection of elements giving details of a job location. |  |  |  |
|  | ServiceDateTime | datetime | 0 | U |
|  | The actual and/or schedule dates for a service. |  |  |  |
|  | CountryOfOrigin |  | 0 | 1 |
|  | The country where product originates or is deemed to have originated. |  |  |  |
|  | CountryOfFinalDestination |  | 0 | 1 |
|  | The country where product is ultimately delivered or is deemed to have been delivered. |  |  |  |
|  | TransportInformation |  | 0 | 1 |
|  | A code indicating the mode of transportation used to move product. |  |  |  |
|  | PaymentTerms |  | 0 | 1 |
|  | A collection of elements detailing payment terms information. |  |  |  |
|  | CreditCardInformation |  | 0 | 1 |
|  | A collection of elements defining the details of a credit card. |  |  |  |
|  | Speciallnstructions | string | 0 | U |
|  | A free-form textual description of special requirements. |  |  |  |

## OrderChangeLineltem

A collection of elements defining the details of the line items making up the change order.

| note |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| children | Name | Type | Use | Max |
|  | LineltemNumber | string | M | 1 |
|  | A sequential individual line identifier within a document containing service or item information. |  |  |  |
|  | ItemDetailChangeCode | string | M | 1 |
|  | A code identifying the type of change to the line item. |  |  |  |
|  | Add |  |  |  |
|  | Delete |  |  |  |
|  | ModifyPrice |  |  |  |
|  | ModifyQuantity |  |  |  |
|  | ModifyLocation |  |  |  |
|  | ModifyPartner |  |  |  |
|  | ModifyPaymentTerms |  |  |  |
|  | ModifyTransportInformation |  |  |  |
|  | ModifyScheduleDates |  |  |  |
|  | ModifyOther |  |  |  |
|  | LineltemInformation |  | M | 1 |
|  | A collection of elements detailing identifying information about a line item. |  | M | 1 |
|  | The number of units of an item or service ordered. |  |  |  |
|  | CommodityCode | string | 0 | U |
|  | A code indicating the categorization of a product or service in accordance with a particular standard. |  |  |  |
|  | PurchaseOrderLineltemNumber | string | 0 | 1 |
|  | A sequential individual line identifier within a purchase order document containing product or item information. |  |  |  |
|  | PurchaseOrderinformation |  | 0 | 1 |
|  | A collection of elements containing relevant purchase order information which needs to be referenced within other documentation and/or messages. |  |  |  |
|  | PartnerInformation |  | 0 | U |
|  | A collection of elements detailing partner information. |  |  |  |
|  | JobLocationInformation |  | 0 | 1 |
|  | A collection of elements giving details of a job location. |  |  |  |
|  | Pricing |  | 0 | 1 |
|  | A collection of elements detailing price information. |  |  |  |
|  | AllowanceOrCharge |  | 0 | U |
|  | A collection of elements defining the details of an allowance or charge to the customer. |  |  |  |
|  | Tax |  | 0 | U |
|  | A collection of elements detailing information about tax applied to a transaction. LineltemTotal |  | 0 | 1 |
|  | The net total monetary amount for the line item. |  |  |  |
|  | ServiceDateTime | datetime | 0 | U |
|  | The actual and/or schedule dates for a service. |  |  |  |

|  | $\underline{\text { TotalAmount }}$ |  |  |  |
| parent(s) | OrderChange |  |  |  |

## Addressinformation

A collection of elements defining the details of an address.

| note |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| level | OrderChangeDetails |  |  |  |
| children | Name | Type | Use | Max |
|  | POBoxNumber | string | 0 | 1 |
|  | The identity of a physical box within a postal facility to accept and receive mail. |  |  |  |
|  | BuildingHouseNumber | string | 0 | 1 |
|  | The alphanumeric identifier of a building as a part of an address. |  |  |  |
|  | StreetName | string | 0 | 1 |
|  | The name of a street as part of an address. |  |  |  |
|  | AddressLine | string | 0 | U |
|  | An occurrence of a generally accepted formatted line of data such that when combined with the entire address structure there is sufficient information for delivery or location purposes. |  |  |  |
|  | CityName | string | 0 | 1 |
|  | The name of the city or municipality. |  |  |  |
|  | StateProvince | string | 0 | 1 |
|  | The name of the municipality or town as a location for mailing, siting and other geographic functions. |  |  |  |
|  | PostalCode | string | 0 | 1 |
|  | The code assigned by local postal authorities to delivery addresses. |  |  |  |
|  | PostalCountry |  | 0 | 1 |
|  | The country code indicating the country to which mail should be delivered. |  |  |  |
|  | CountyName | string | 0 | 1 |
|  | The name of the county. |  |  |  |
|  | Locationldentifier |  |  |  |
|  | A unique identifier for a physical location. |  |  |  |
| parent(s) | JobLocationInformation |  |  |  |
|  | Location |  |  |  |
|  | PartnerInformation |  |  |  |
|  | TaxLocation |  |  |  |

## AllowanceOrCharge

A collection of elements defining the details of an allowance or charge to the customer.

| note | - If AllowanceOrCharge is used, then at least one of AllowanceOrChargeRate, AllowanceOrChargeTotalAmount, or AllowanceOrChargePercent is required. |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| level | OrderChangeDetails |  |  |  |
| children | Name | Type | Use | Max |
|  | AllowanceOrChargeTotalAmount |  | 0 | 1 |
|  | The total monetary amount for the allowance or charge. |  |  |  |
|  | AllowanceOrChargeRate |  | 0 | 1 |
|  | The rate per unit of the allowance or charge. |  |  |  |
|  | AllowanceOrChargePercent | decimal | 0 | 1 |
|  | The allowance or charge expressed as a percentage. |  |  |  |
|  | AllowanceOrChargeNumber | string | 0 | 1 |
|  | The identifier assigned by a vendor referencing an allowance, promotion, deal or charge. |  |  |  |
|  | AllowanceOrChargeTypeCode | string | 0 | 1 |
|  | A code identifying the kind of allowance or charge being described. |  |  |  |
|  | Freight |  |  |  |
|  | FuelSurcharge |  |  |  |
|  | SpecialHandlingService |  |  |  |
|  | Discount |  |  |  |

The place to go for
oil and gas e-business standa

## SecondCurrency

The currency code indicating a second currency, such as for European countries using the Euro and a local currency.

| note |  |  |  |  |
| ---: | :--- | :--- | :--- | :---: |
| level | OrderChangeProperties | Type | Use | Max |
| children | Name | string | $\mathbf{M}$ | $\mathbf{1}$ |
|  | CurrencyCode |  |  |  |
|  | A code indicating the currency in which the monetary amount is specified. <br> Use the codelist from ISO 4217:2001 Codes for the representation of currencies <br> and funds. |  |  |  |
| parent(s) | OrderChangeProperties |  |  |  |

## ServiceDateTime

The actual and/or schedule dates for a service.

| note | Format is CCYY-MM-DDThh:mm:ss where "CC" represents the century, "YY" the year, "MM" the month and "DD" the day. The letter "T" is the date/time separator and "hh", "mm", "ss" represent hour, minute and second respectively. <br> The CCYY field must have at least four digits, the MM, DD, SS, hh, mm and ss fields exactly two digits each. Leading zeroes must be used if the field would otherwise have too few digits. <br> If no time is to be given then use zeroes in the hh, mm and ss fields. <br> This representation may be immediately followed by a "Z" to indicate Coordinated Universal Time (UTC) or, to indicate the time zone, i.e. the difference between the local time and Coordinated Universal Time, immediately followed by a sign, + or - , followed by the difference from UTC represented as hh:mm (note: the minutes part is required). For example, to indicate $1: 20$ pm on May the 31st, 1999 for Eastern Standard Time which is 5 hours behind Coordinated Universal Time (UTC), one would write: 1999-05-31T13:20:00-05:00. |

## Appendix G: Cementing Template

## Business Process Diagram

Below is the Business Process Diagram for the Cementing Template document. This is not the only method in which a template can be processed, however, it represents a primary process. Third parties, including a Marketplace, may be involved if necessary.

Process Model - A Buyer determines that a service is necessary and makes a decision to create a request for quote or an order. The Buyer determines the specifications for the service and completes a Cementing Template. The template is sent along with the transaction document (QuoteRequest, OrderCreate, etc.). The Seller processes the transaction and creates a response. The response is sent to the Buyer.

The Cementing Template document is used to provide detailed information specific to a cementing service to a Seller. The template was designed to be an attachment to another transaction, rather than as a standalone document.

## Legend to Tables

The following tables detail the elements and attributes that make up the Cementing Template. The legend below provides guidance to understanding the element tables. The legend is an example only and is not part of the document standard data.

## Telephone

A collection of elements detailing information about a telephone number.

\begin{tabular}{|c|c|c|c|c|}
\hline \multicolumn{5}{|l|}{(3) note} \\
\hline level \& \multicolumn{4}{|l|}{\begin{tabular}{l}

stri 13
\] \& Use

0 \& ixed <br>
\hline
\end{tabular}

| Legend |  |
| :--- | :--- |
| 1 | The name of the element. |
| 2 | The definition of the element. |
| 3 | Contains any business rules or comments about the element |
| 4 | Identifies whether or not the element is under the Property, Detail, or Summary level of the document |
| 5 | Contains the name of the child elements and their definitions. Those elements in blue are links to the element <br> specification. Only those elements that contain children or attributes are hyperlinked. |
| 6 | Indicates the data type of the element. |
| 7 | Indicates whether the element is mandatory (M) or optional (O). |
| 8 | Indicates whether the element can have a maximum of one occurrence (1) or unbounded multiple occurrences (U) |
| 9 | Indicates the parent element of the element. |
| 10 | Contains the name of any attributes and their definitions. |
| 11 | Indicates the data type of the attribute. If the type is blank, then the element contains children rather than data. |
| 12 | Indicates whether the attribute is mandatory (M) or optional (O). |

| 13 | Provides a fixed value for the attribute. |
| :--- | :--- |
| 14 | The shaded areas provide either code list values, rules, or notes about the child element or attribute. |

The document, its properties, details, line item, sub-line item, and summary elements are presented first. They are followed by an alphabetical listing of those elements used in the document and have children or attributes.

## Document Detail

## CementingTemplate

The root element of the Cementing Template message. It is used to provide specifications for a cementing job.

| note |  |  |  |
| ---: | :--- | :---: | :---: |
| children | Name | Type | Use |
|  | TemplateProperties | Max | $\mathbf{1}$ |
|  | A collection of elements defining the template "meta-data" or "common data". |  |  |
|  | CementingTemplateDetail |  |  |

## TemplateProperties

A collection of elements defining the template "meta-data" or "common data".

| note |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| children | Name | Type | Use | Max |
|  | TemplateNumber | string | M | 1 |
|  | A number which uniquely identifies the template. |  |  |  |
|  | TemplatelssuedDate | date | M | 1 |
|  | The date upon which the template was created or issued. |  |  |  |
|  | CommodityCode | string | M | 1 |
|  | A code indicating the categorization of a product or service in accordance with a particular standard. |  |  |  |
|  | Referencelnformation |  | 0 | $\mathbf{U}$ |
|  | A collection of elements detailing references to information that reside outside of the current transaction message. |  |  |  |
|  | ResponseDate | date | 0 | 1 |
|  | The date upon which a response to the template is made. |  |  |  |
| parent(s) | CementingTemplate |  |  |  |

## CementingTemplateDetail

A collection of elements providing the detail of the cementing service.

| note |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| children | Name | Type | Use | Max |
|  | JobType |  | M | 1 |
|  | A code indicating the type of job being performed. |  |  |  |
|  | ConductorCasing |  |  |  |
|  | Intermediate |  |  |  |
|  | Liner |  |  |  |
|  | Production |  |  |  |
|  | SurfaceCasing |  |  |  |
|  | Other |  |  |  |
|  | WellDetail |  | M | 1 |
|  | A collection of elements containing details about a well. |  |  |  |
|  | CasingInformation |  | M | 1 |
|  | A collection of elements containing information about casing. |  |  |  |
|  | BargeRequiredFlag | boolean | 0 | 1 |
|  | A flag indicating whether a barge is required. It assists in determining truck or skid equipment. |  |  |  |
|  | JobDescription | string | 0 | 1 |
|  | A free-form textual description of the job. |  |  |  |
|  | OneWayMileage |  | 0 | 1 |
|  | The measurement and unit of measure for the mileage from the service point to dock or location. |  |  |  |
|  | MudDetail |  | 0 | 1 |
|  | A collection of elements that contain information about mud. |  |  |  |
|  | CementDetail |  | 0 | 1 |
|  | A collection of elements providing detail about cement. |  |  |  |
|  | Comment | string | 0 | 1 |
|  | A free-form textual structure for general information or comments. |  |  |  |
| parent(s) | CementingTemplate |  |  |  |

## BottomHoleCirculationTemperature

The measurement and unit of measure for the circulation temperature of the well as determine by the customer.

| note |  |  |  |  |
| ---: | :--- | :--- | :---: | :---: |
| children | Name | Type | Use | Max |
|  | Measurement | decimal | M | $\mathbf{1}$ |
|  | A numeric value for technical or attribute data. | string | M | $\mathbf{1}$ |
|  | UnitOfMeasureCode |  |  |  |
|  | A code identifying the units in which measurement is expressed. |  |  |  |
|  | Use values from the DE 355 code list contained in ASC X12 release 3030. |  |  |  |
| parent(s) | WellDetail |  |  |  |

## BottomHoleStaticTemperature

The measurement and unit of measure for the static temperature of the well as determine by the customer.

The place to go for
oil and gas e-business standards

|  | Measurement | decimal | M | $\mathbf{1}$ |
| :--- | :--- | :--- | :---: | :---: |
|  | A numeric value for technical or attribute data. |  |  |  |
|  | UnitOfMeasureCode | string | M | $\mathbf{1}$ |
|  | A code identifying the units in which measurement is expressed. |  |  |  |
| Use values from the DE 355 code list contained in ASC X12 release 3030. |  |  |  |  |
| parent(s) | $\underline{\text { WellDetail }}$ |  |  |  |

## CasingInformation

A collection of elements containing information about casing.

| note |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| children | Name | Type | Use | Max |
|  | CasingSize |  | M | 1 |
|  | The measurement and unit of measure for the size of a casing. |  |  |  |
|  | CasingGrade | string | 0 | 1 |
|  | The grade of the casing. An API grade or other. |  |  |  |
|  | CasingWeight |  | 0 | 1 |
|  | The measurement and unit of measure for the document weight of a linear unit of casing with or without a collar. |  |  |  |
|  | PreviousCasingSize |  | 0 | 1 |
|  | The measurement and unit of measure for the diameter of the previous casing. |  |  |  |
|  | PreviousCasingWeight |  | 0 | 1 |
|  | The measurement and unit of measure for the document weight of a linear unit of casing with or without a collar. |  |  |  |
|  | PreviousCasingMeasureDepth |  | 0 | 1 |
|  | The measurement and unit of measure for the depth of the previous casing. |  |  |  |
|  | PreviousCasingTrueVerticalDepth |  | 0 | 1 |
|  | The measurement and unit of measure for the true vertical depth of the previous casing. |  |  |  |
| parent(s) | CementingTemplateDetail |  |  |  |

## CasingSize

The measurement and unit of measure for the size of a casing.

| note |  |  |  |  |
| ---: | :--- | :--- | :---: | :---: |
| children | Name | Type | Use | Max |
|  | Measurement | decimal | M | $\mathbf{1}$ |
|  | A numeric value for technical or attribute data. | string | $\mathbf{M}$ | $\mathbf{1}$ |
|  | UnitOfMeasureCode |  |  |  |
|  | A code identifying the units in which measurement is expressed. |  |  |  |
|  | Use values from the DE 355 code list contained in ASC X12 release 3030. |  |  |  |
| parent(s) | $\underline{\text { CasingInformation }}$ |  |  |  |

## CasingWeight

The measurement and unit of measure for the document weight of a linear unit of casing with or without a collar.

| note |  |  |  |  |
| ---: | :--- | :--- | :---: | :---: |
| children | Name | Type | Use | Max |
|  | Measurement | decimal | $\mathbf{M}$ | $\mathbf{1}$ |
|  | A numeric value for technical or attribute data. | string | $\mathbf{M}$ | $\mathbf{1}$ |
|  | UnitOfMeasureCode |  |  |  |
|  | A code identifying the units in which measurement is expressed. |  |  |  |
|  | Use values from the DE 355 code list contained in ASC X12 release 3030. |  |  |  |
| parent(s) | $\underline{\text { CasingInformation }}$ |  |  |  |

## CementAboveLiner

The measurement and unit of measure for the height of cement above the liner.

| note |  |  |  |  |
| ---: | :--- | :--- | :---: | :---: |
| children | Name | Type | Use | Max |
|  | Measurement | decimal | $\mathbf{M}$ | $\mathbf{1}$ |
|  | A numeric value for technical or attribute data. | string | $\mathbf{M}$ | $\mathbf{1}$ |
|  | UnitOfMeasureCode |  |  |  |
|  | A code identifying the units in which measurement is expressed. |  |  |  |
|  | Use values from the DE 355 code list contained in ASC X12 release 3030. |  |  |  |
| parent(s) | $\underline{\text { CementDetail }}$ |  |  |  |

## CementDetail

A collection of elements providing detail about cement.

## CementHeight

The measurement and unit of measure for the expected height of cement after the job.

| note |  |  |  |  |
| ---: | :--- | :--- | :---: | :---: |
| children | Name | Type | Use | Max |
|  | Measurement | decimal | $\mathbf{M}$ | $\mathbf{1}$ |

The place to go for
oil and gas e-business standards

|  | A numeric value for technical or attribute data. | string |
| :--- | :--- | :--- |
|  | UnitOfMeasureCode |  |
| A code identifying the units in which measurement is expressed. |  |  |
| Use values from the DE 355 code list contained in ASC X12 release 3030. | M | $\mathbf{1}$ |
| parent(s) | $\underline{\text { CementDetail }}$ |  |

## CementTopNominal

The measurement and unit of measure for the expected top of cement after job.

| note |  |  |  |  |
| ---: | :--- | :--- | :---: | :---: |
| children | Name | Type | Use | Max |
|  | Measurement | decimal | M | $\mathbf{1}$ |
|  | A numeric value for technical or attribute data. | string | M | $\mathbf{1}$ |
|  | UnitOfMeasureCode |  |  |  |
|  | A code identifying the units in which measurement is expressed. |  |  |  |
| Use values from the DE 355 code list contained in ASC X12 release 3030. |  |  |  |  |
| parent(s) | CementDetail |  |  |  |

## CommodityCode

A code indicating the categorization of a product or service in accordance with a particular standard.

| note |  |  |  |
| ---: | :--- | :--- | :--- |
| parent(s) | TemplateProperties | Type | Use |

## DesiredFill

The measurement and unit of measure for the desired amount of fill.

| note |  |  |  |  |
| ---: | :--- | :--- | :---: | :---: |
| children | Name | Type | Use | Max |
|  | Measurement | decimal | M | $\mathbf{1}$ |
|  | A numeric value for technical or attribute data. | string | $\mathbf{M}$ | $\mathbf{1}$ |
|  | UnitOfMeasureCode |  |  |  |
|  | A code identifying the units in which measurement is expressed. |  |  |  |
|  | Use values from the DE 355 code list contained in ASC X12 release 3030. |  |  |  |
| parent(s) | $\underline{\text { Lead }}$ |  |  |  |
|  | $\underline{\text { Tail }}$ |  |  |  |

## Lead

A collection of elements that contain information relating to the tail.

| note |  |  |  |  |
| ---: | :--- | :---: | :---: | :---: |
| children | Name | Type | Use | Max |
|  | PercentExcess | decimal | $\mathbf{0}$ | $\mathbf{1}$ |
|  | The excess cement divided by the calculated volume, expressed as a percentage. |  |  |  |
|  | DesiredFill | $\mathbf{0}$ | $\mathbf{1}$ |  |
|  | The measurement and unit of measure for the desired amount of fill. | string | $\mathbf{0}$ | $\mathbf{1}$ |
|  | CementDescription <br> A free-form textual description of the cement used. |  |  |  |
| parent(s) | $\underline{\text { CementDetail }}$ |  |  |  |

## LinerTopDepth

The measurement and unit of measure for the depth of the liner top.

| note |  |  |
| ---: | :--- | :--- |
| children | Name | Type |
|  | Measurement | decimal |
|  | A numeric value for technical or attribute data. | M |
|  | UnitOfMeasureCode | $\mathbf{1}$ |
|  | A code identifying the units in which measurement is expressed. | string |
|  | Use values from the DE 355 code list contained in ASC X12 release 3030. | $\mathbf{M}$ |
| parent(s) | $\underline{\text { CementDetail }}$ | $\mathbf{1}$ |

## MudDetail

A collection of elements that contain information about mud.

| note |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| children | Name | Type | Use | Max |
|  | MudType | string | 0 | 1 |
|  | An indicator of the type of mud being used. |  |  |  |
|  | MudWeight |  | 0 | 1 |
|  | The measurement and unit of measure for the weight of the mud. |  |  |  |
| parent(s) | CementingTemplateDetail |  |  |  |

## MudWeight

The measurement and unit of measure for the weight of the mud.

| note |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| children | Name | Type | Use | Max |
|  | Measurement | decimal | M | 1 |
|  | A numeric value for technical or attribute data. |  |  |  |
|  | UnitOfMeasureCode | string | M | 1 |
|  | A code identifying the units in which measurement is expressed. |  |  |  |
|  | Use values from the DE 355 code list contained in ASC X12 release 3030. |  |  |  |
| parent(s) | MudDetail |  |  |  |

## OneWayMileage

The measurement and unit of measure for the mileage from the service point to dock or location.

| note |  |  |  |  |
| ---: | :--- | :--- | :---: | :---: |
| children | Name | Type | Use | Max |
|  | Measurement | string | $\mathbf{M}$ | $\mathbf{1}$ |
|  | A numeric value for technical or attribute data. | string | $\mathbf{M}$ | $\mathbf{1}$ |
|  | UnitOfMeasureCode |  |  |  |
|  | A code identifying the units in which measurement is expressed. |  |  |  |
|  | Use values from the DE 355 code list contained in ASC X12 release 3030. |  |  |  |
| parent(s) | $\underline{\text { CementingTemplateDetail }}$ |  |  |  |

## OpenHoleSize

The measurement and unit of measure for the diameter of the hole.

| note |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| children | Name | Type | Use | Max |
|  | Measurement | string | M | 1 |
|  | A numeric value for technical or attribute data. |  |  |  |
|  | UnitOfMeasureCode | string | M | 1 |
|  | A code identifying the units in which measurement is expressed. |  |  |  |
|  | Use values from the DE 355 code list contained in ASC X12 release 3030. |  |  |  |
| parent(s) | WellDetail |  |  |  |

## PreflushSpaceDensity

The measurement and unit of measure for the density of the substance.

| note |  |  |  |  |
| ---: | :--- | :--- | :---: | :---: |
| children | Name | Type | Use | Max |
|  | Measurement | string | $\mathbf{M}$ | $\mathbf{1}$ |
|  | A numeric value for technical or attribute data. | string | $\mathbf{M}$ | $\mathbf{1}$ |
|  | UnitOfMeasureCode |  |  |  |
|  | A code identifying the units in which measurement is expressed. |  |  |  |
| parent(s) | CementDetail |  |  |  |

## PreviousCasingMeasureDepth

The measurement and unit of measure for the depth of the previous casing.

| note |  |  |
| ---: | :--- | :--- |
| children | Name | Type |
|  | Measurement | Use |
|  | A numeric value for technical or attribute data. | Max |
|  | UnitOfMeasureCode | $\mathbf{M}$ |
|  | A code identifying the units in which measurement is expressed. |  |
|  | Use values from the DE 355 code list contained in ASC X12 release 3030. | string |
| parent(s) | $\underline{\text { Casinglnformation }}$ | $\mathbf{1}$ |

## PreviousCasingSize

The measurement and unit of measure for the diameter of the previous casing

| note |  |  |  |  |
| ---: | :--- | :--- | :---: | :---: |
| children | Name | Type | Use | Max |
|  | Measurement | decimal | $\mathbf{M}$ | $\mathbf{1}$ |
|  | A numeric value for technical or attribute data. | string | $\mathbf{M}$ | $\mathbf{1}$ |
|  | UnitOfMeasureCode |  |  |  |
|  | A code identifying the units in which measurement is expressed. |  |  |  |
|  | Use values from the DE 355 code list contained in ASC X12 release 3030. |  |  |  |
| parent(s) | $\underline{\text { CasingInformation }}$ |  |  |  |

The place to go for

## PreviousCasingTrueVerticalDepth

The measurement and unit of measure for the true vertical depth of the previous casing.

| note |  |  |  |  |
| ---: | :--- | :--- | :---: | :---: |
| children | Name | Type | Use | Max |
|  | Measurement | decimal | $\mathbf{M}$ | $\mathbf{1}$ |
|  | A numeric value for technical or attribute data. | string | $\mathbf{M}$ | $\mathbf{1}$ |
|  | UnitOfMeasureCode |  |  |  |
|  | A code identifying the units in which measurement is expressed. |  |  |  |
|  | Use values from the DE 355 code list contained in ASC X12 release 3030. |  |  |  |
| parent(s) | $\underline{\text { CasingInformation }}$ |  |  |  |

## PreviousCasingWeight

The measurement and unit of measure for the document weight of a linear unit of casing with or without a collar.

| note |  |  |  |  |
| ---: | :--- | :--- | :---: | :---: |
| children | Name | Type | Use | Max |
|  | Measurement | decimal | $\mathbf{M}$ | $\mathbf{1}$ |
|  | A numeric value for technical or attribute data. | string | $\mathbf{M}$ | $\mathbf{1}$ |
|  | UnitOfMeasureCode |  |  |  |
|  | A code identifying the units in which measurement is expressed. |  |  |  |
|  | Use values from the DE 355 code list contained in ASC X12 release 3030. |  |  |  |
| parent(s) | CasingInformation |  |  |  |

## Referencelnformation

A collection of elements detailing references to information that reside outside of the current transaction message.

| note |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| children | Name | Type | Use | Max |
|  | ReferenceNumber <br> A number or identifier that is used to reference documents or information not included within a particular message. The referenceInformationIndicator attribute qualifies what this number references | string | M | 1 |
|  | Description <br> A free-form textual explanation or clarification. | string | 0 | 1 |
| parent(s) | TemplateProperties |  |  |  |
| attributes | Name | Type string | Use$\mathbf{M}$ | Fixed |
|  | referenceInformationIndicator <br> A code to identify what type of information is being referenced. |  |  |  |
|  | AFENumber |  |  |  |
|  | BatchNumber |  |  |  |
|  | BillOfLading |  |  |  |
|  | Certification |  |  |  |
|  | CertifiedInspectionTestResults |  |  |  |
|  | ConfigurationNumber |  |  |  |
|  | ContractNumber |  |  |  |
|  | CostAllocationReference |  |  |  |
|  | CostCenter |  |  |  |
|  | CustomerAccountingReference |  |  |  |
|  | CustomerReferenceNumber |  |  |  |
|  | DeliveryTicketNumber |  |  |  |
|  | Divisionldentifier |  |  |  |
|  | EngineeringChangeOrderNumber |  |  |  |
|  | JobNumber |  |  |  |
|  | LetterOfCreditNumber |  |  |  |
|  | LocationNumber |  |  |  |
|  | MaterialSafetyDataSheet |  |  |  |
|  | OperatorGeneralLedgerCode |  |  |  |
|  | OriginallnvoiceNumber |  |  |  |
|  | PriceAreaNumber |  |  |  |
|  | ProjectNumber |  |  |  |
|  | ProposalNumber |  |  |  |
|  | QuoteNumber |  |  |  |
|  | RequestForQuotationNumber |  |  |  |
|  | TemplateNumber |  |  |  |
|  | Other |  |  |  |

## ShoeJointLength

The measurement and unit of measure of the length of a shoe joint.

| note |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| children | Name | Type | Use | Max |
|  | Measurement | decimal | M | 1 |
|  | A numeric value for technical or attribute data. |  |  |  |
|  | UnitOfMeasureCode | string | M | 1 |
|  | A code identifying the units in which measurement is expressed. |  |  |  |
|  | Use values from the DE 355 code list contained in ASC X12 release 3030. |  |  |  |
| parent(s) | WellDetail |  |  |  |

## Tail

A collection of elements that contain information relating to the tail.

| note |  |  |  |  |
| ---: | :--- | :--- | :---: | :---: |
| children | Name | Type | Use | Max |
|  | PercentExcess | decimal | $\mathbf{0}$ | $\mathbf{1}$ |
|  | The excess cement divided by the calculated volume, expressed as a percentage. |  |  |  |
|  | DesiredFill | $\mathbf{0}$ | $\mathbf{1}$ |  |
|  | The measurement and unit of measure for the desired amount of fill. | string | $\mathbf{0}$ | $\mathbf{1}$ |
|  | CementDescription <br> A free-form textual description of the cement used. |  |  |  |
| parent(s) | $\underline{\text { CementDetail }}$ |  |  |  |

## TotalDepth

The measurement and unit of measure for the proposed or actual depth the well is drilled or based for services.

| note |  |  |  |  |
| ---: | :--- | :--- | :---: | :---: |
| children | Name | Type | Use | Max |
|  | Measurement | decimal | M | $\mathbf{1}$ |
|  | A numeric value for technical or attribute data. | string | M | $\mathbf{1}$ |
|  | UnitOfMeasureCode |  |  |  |
|  | A code identifying the units in which measurement is expressed. |  |  |  |
|  | Use values from the DE 355 code list contained in ASC X12 release 3030. |  |  |  |
| parent(s) | $\underline{\text { WellDetail }}$ |  |  |  |

## WaterDepthNominal

The measurement and unit of measure for the depth from sea level to ocean floor at mean tide.

| note |  |  |  |  |
| ---: | :--- | :--- | :---: | :---: |
| children | Name | Type | Use | Max |
|  | Measurement | decimal | M | $\mathbf{1}$ |
|  | A numeric value for technical or attribute data. |  |  |  |
|  | UnitOfMeasureCode | string | $\mathbf{M}$ | $\mathbf{1}$ |
|  | A code identifying the units in which measurement is expressed. |  |  |  |
|  | Use values from the DE 355 code list contained in ASC X12 release 3030. |  |  |  |
| parent(s) | WellDetail |  |  |  |

## WellDetail

A collection of elements containing details about a well.

| note |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| children | Name | Type | Use | Max |
|  | TotalDepth |  | M | 1 |
|  | The measurement and unit of measure for the proposed or actual depth the well is drilled or based for services. |  |  |  |
|  | OpenHoleSize |  | M | 1 |
|  | The measurement and unit of measure for the diameter of the hole. <br> Shoe JointLength |  | 0 | 1 |
|  | The measurement and unit of measure of the length of a shoe joint. |  |  |  |
|  | BottomHoleStaticTemperature |  | 0 | 1 |
|  | The measurement and unit of measure for the static temperature of the well as determine by the customer. |  |  |  |
|  | LinerTopDepth |  | 0 | 1 |
|  | The measurement and unit of measure for the depth of the liner top. WaterDepthNominal |  | 0 | 1 |
|  | The measurement and unit of measure for the depth from sea level to ocean floor at mean tide. |  |  |  |
|  | BottomHoleCirculationTemperature |  | 0 | 1 |
|  | The measurement and unit of measure for the circulation temperature of the well as determine by the customer. |  |  |  |
|  | H2SinHoleFlag | Boolean | 0 | 1 |
|  | Flag indicating the presence of hydrogen sulfide in a hole. |  |  |  |
|  | PercentH2SinHole | decimal | 0 | 1 |
|  | The percentage of hydrogen sulfide present in the hole. |  |  |  |
| parent(s) | CementingTemplateDetail |  |  |  |

## Appendix H: Glossary

| Term | Definition |
| :---: | :---: |
| CIDX | Chemical Industry Data Exchange. A chemical industry consortium focused on standardizing data communications among the chemical industry companies. CIDX has published the Chem eStandards which define DTD XML formats for forty-four business transactions. Web site: www.cidx.org |
| Component Library | Reusable PIDX XML Schema components are stored in an XML Schema named PIDXlib.xsd. PIDXlib.xsd is the component library. |
| Com.Pro.Serv. | Complex Products and Services Task Group. Project team sanctioned by the Petroleum Industry Data eXchange (PIDX). |
| Document Type Declaration | A statement within an XML Schema that identifies a DTD that can be used for XML instance document validation. Never abbreviated DTD. <br> <!DOCTYPE name-of-root-element SYSTEM "URL -of-the-external-DTD" [internal DTD subset] |
| Document Type Definition | A text-related schema language that may be used to define XML instance (data) files. May be abbreviated DTD. |
| DTD | Please see Document Type Definition. |
| EDI | Please see Electronic Data Interchange. |
| Electronic Data Interchange | The American National Standards Institute (ANSI) chartered the Accredited Standards Committee (ASC) X12 to develop uniform standards for inter-industry electronic interchange of business transactions -- Electronic Data Interchange (EDI). ANSI X. 12 Electronic Data Interchange (EDI) standards define the data formats that allow companies to exchange business data electronically. Web site: www.x12.org |
| Extensible Markup Language | Extensible Markup Language (XML) is a standard for defining data using data tags and other markup constructs. XML allows the user to define tags in addition to predefined tags. The base specifications are XML 1.0, W3C Recommendation Feb '98, and Namespaces, Jan '99. |
|  | The XML standards is maintained by the World Wide Web Consortium. The base specifications are XML 1.0 Second addition, W3C Recommendation 6 October 2000 (web site: www.w3.org/TR/2000/REC-xml-20001006), and Namespaces, 14 January |
|  | 1999 (web site: www.w3.org/TR/1999/REC-xml-names-19990114/) |
| Information Item | XML element or attribute |
| Instance Document | An XML data document that conforms to the W3C XML standard. |

## Definition

An organization sanctioned to promote and facilitate the exchange of electronic data within the petroleum industry.

Please see Petroleum Industry Data eXchange International

RosettaNet RosettaNet is an electronic data exchange standards body that focuses on the high technology, electronics manufacturing industry. It seeks to establish a common data and process model for B2B interaction among semiconductor, electronic components, and information technology manufacturers, suppliers, and distributors.

A RosettaNet specification standard that describes the mechanisms for packaging and transporting XML instance (data) documents. RNIF

XML information items in the PIDXLib.xsd XML Schema that are used in multiple XML Schemas.

Please see RosettaNet Implementation Framework.
The XML instance (data) document within an RNIF message. The Service Content is a MIME part of a MIME multipart/related document.

The PIDX implementation of the RosettaNet Implementation Framework 2.0 (RNIF 2.0) standard.

Please see Transport, Routing, and Packaging
The process of comparing an XML instance (data) document to an XML Schema.
The World Wide Web Consortium (W3C) has developed more than 35 technical specification for the Web's infrastructure. These standards include standards for XML and XML Schemas. Web Site: www.w3c.org

Please see the World Wide Web Consortium.

The XML Schema as defined by the May 2, 2001 XML Schema Recommendation published by the W3C.
http://www.w3.org/TR/2001/REC-xmlschema-0-20010502/
http://www.w3.org/TR/2001/REC-xmlschema-1-20010502/
http://www.w3.org/TR/2001/REC-xmlschema-2-20010502/
