

# NonCompliance

## PIDX/RN Revision Project

### RosettaNet 2.0 Compliance

PIDX adopted RosettaNet 2.0 as a messaging standard to facilitate business document exchange between partners. PIDX/RN implementations should reference the RosettaNet 2.0 specification as the authoritative source for technical details. A variety of certified RosettaNet software packages and middleware adapters are available. All aspects of the RosettaNet 2.0 messaging standard must be followed unless specifically stated otherwise in the PIDX/RN documentation.

Custom messaging that does not adhere to the RosettaNet 2.0 standard is highly discouraged and does not comply with the PIDX/RN standard. While the PIDX/RN standard does not prevent custom messaging accommodations between two partners, the practice is highly discouraged because it does not facilitate common standards across the industry. **Non standard solutions MUST NOT be referred to as a PIDX solution.**
