2023 Year in Review Newsletter

ATTRACT, ENGAGE, RETAIN

MEMBERS

We express our gratitude to our valued members. PIDX and its Members are pivotal leaders in shaping eBusiness standards for the oil and gas industry. As with many not-for-profit organizations, PIDX relies on the support of membership dues and the dedication of member volunteers to fulfill its mission.

Racing | TRANSPORT4 | Weatherford

A WORD FROM THE PIDX BOARD

In 2023, PIDX saw significant achievements. We developed and published new standards, driving their adoption and strengthening our executive committee with industry appointees. Despite the inherent challenges in standards development, our collaborative efforts consistently deliver valuable outcomes. For instance, the ETDX workgroup's four-year journey to finalize the Scope 3 Emissions reporting implementation model exemplifies our commitment to collaboration.

Looking ahead to 2024, we anticipate challenges but are confident in our ability to leverage shared goals, knowledge, and innovation. Proudly serving on a Board where our community continually raises the bar, I'm excited about the upcoming bp-hosted April conference, where we'll explore topics like AI and its impact on our efforts.

I encourage your continued support for PIDX through engagement in events and workgroups. Our community thrives on your participation.

Shawn Green
Manager, Global Services & Technology, ConocoPhillips
PIDX Global Services & Technology Board Member

PIDX 2023 SPRING CONFERENCE

How Investing in Digital Transformation Can Reduce Business Costs

ConocoPhillips | Houston, TX

"The 2023 Spring Conference was excellent. The lunch was delicious.

- Susette McNeel, GeoInvoice

"Thanks again for organizing such an amazing PIDX event, PIDX did a wonderful job!"

- Nu Buchanan, Halliburton

85%

participants found the event enjoyable

PIDX UPDATES BYLAWS TO STREAMLINE THE VOTING PROCESS FOR APPROVING STANDARDS

With the rapid adoption of digital technologies, increased remote working and increasing need for efficiency, PIDX has advanced its standards development process substantially since it originally pioneered the development of Electronic Data Interchange (EDI) in the 1980s and XML standards in the early 2000s. Revisiting the bylaws is an important step in becoming more agile as the organization continues to develop standards by the industry, for the industry.

PIDX **EXECUTIVE AT LARGE**

Adan is a seasoned professional with 22+ years of experience in project life-cycle management, business process optimization, and custom software solutions within the Oil and Gas industry. He is currently the Senior Manager at Halliburton, overseeing Global eCommerce. Adan excels in driving efficient operations, ensuring seamless customer experiences, and delivering innovative solutions. With a Bachelor's degree in Mechanical Engineering Technology from the University of Houston, his deep industry knowledge enables him to make valuable contributions to Halliburton's success.

Adan Solis
Sr. Manager, Opportunity to Cash eCommerce
Halliburton

PIDX ETDX continues its collaboration with both **Open Footprint** and the **World Business Council for Sustainable Development** (WBCSD), aiming to harmonize with global organizations that are working on Scope 3 emissions standards at scale. The central focus remains on achieving interoperability across various technology solutions.

PIDX PROCEDURES FOR STANDARDS DEVELOPMENT CHANGES PROPOSED AND VOTED ON BY STANDARDS AND GUIDELINES (S&G) COMMITTEE TO INCORPORATE STANDARDS ADOPTION

"Standards Adoption will guarantee new standards get used and deployed efficiently and effectively, which delivers a meaningful return on investment for PIDX members and participants that developed the standard."

"Fine tuning of the standard through early adopters will ensure the standards developed going forward will be fit for purpose, practical and improve digital business processes in our industry."

CHRIS WELSH
CEO, OFS Portal
PIDX Chairman of the Board

PIDX Enables *eBusiness*

Enabling your digital supply chain is a natural evolution once internal systems and processes have been e-Enabled

PROCESS EFFICIENCIES — Remove Paper, Automate Workflow, Remove Dual Data Entry

INCREASED ACCURACY — Single Source of Data Entry, Reduced Transcription Errors, Using Common Data between Partners

REDUCED COST — Data Entry, Printing & Paper Handling

INCREASED TRANSPARENCY — Data is Exchanged in a Secure and Auditable Way, All Transactions are Recorded in a System

SPEED OF BUSINESS — Exchange of Business Documents takes Minutes; Acknowledgement of Delivery is Automatic

EXCITING DEVELOPMENTS ON THE HORIZON!

PIDX Emissions Transparency Data Exchange (ETDX):
- Moves forward with draft standard for balloting.

PIDX Industrial Data Exchange (IDX) Platform:
- Downstream is actively working on expanding the PIDX Industrial Data Exchange (IDX) Platform to encompass PIDX Company Codes.
