

ItemsDeprecated

PIDX/RN Revision Project

Items Deprecated from the PIDX/RN Standard

PIDX adopted RosettaNet 2.0 as a messaging standard to facilitate business document exchange between partners. PIDX/RN standard originally introduced items into the standard that were not compliant with the RosettaNet 2.0 specification. Any additions to the PIDX/RN standard that require customization of RosettaNet compliant software must have a significant business value to justify the cost of development and maintenance of customized code. The following items have been deprecated based on not meeting these criteria:

- 1) American Petroleum Institute PIDX XML Standards Group is no longer required in the RosettaNet service header. In addition to not adding business value, this addition violated a rule within the PIDX standard (No changes should be made to the Service header structure because this might impact the ability of an automated middleware tool to process the RNIF 2.0 based message).
- 2) The PIDX exception xml schema will no longer be utilized within PIDX/RN messaging. The PIDX exception xml document is identical to the RosettaNet 2.0 exception message except for the use of the PIDX namespace. There is no business value for utilizing a customized exception document for communicating PIDX/RN failures.
