PIDX INTERNATIONAL

Join the Conversation Driving the Future of Energy Standards & AI

Be a featured speaker at the upcoming PIDX Webinar on **Thursday, August 21, 2025 from 9:00 AM to 10:30 AM (CT).** Building on the success of our previous events, this session will focus on the continued evolution of **AI integration and open standards in the energy sector.**

We are currently seeking **two dynamic speakers** to lead the conversation and share insights that help move the industry forward.

Why Speak at a PIDX Webinar?
- Share your expertise with a global audience of industry leaders
- Position yourself and your organization as innovators in AI and standards
- Connect with energy professionals driving digital transformation

Choose a Topic That Resonates With You. Below are four themes. Select one that aligns with your interest—or suggest a variation!

1. From Translation to Transformation: AI-Driven Standardization in the Energy Supply Chain
- How AI is unlocking scalable, accurate data exchange using PIDX open standards
- Focus: Moving beyond product descriptions to automating full supply chain data workflows

2. Standards at Scale: AI-Powered Interoperability for Global Energy Operations
- Enabling real-time, cross-platform data exchange with AI and PIDX frameworks
- Focus: How companies are scaling AI + open standards across regions and systems

3. Next-Level Collaboration: AI + Open Standards for Smarter B2B and B2G Data Exchange
- Reducing friction and enhancing trust across trading partners using AI tools
- Focus: Ideal for panel discussions or member-driven success stories

4. AI in Action: Case Studies on Standardizing Unstructured Supply Chain Data
- Lessons learned from applying AI to real-world energy industry challenges
- Focus: Highlighting real examples from PIDX members and partners

Interested? Let's Connect. If you're available to speak—or know someone who would be a great fit—please reach out. We'd love to explore the possibilities with you.
